

EXPANSION TANK WALL SUPPORT

» 598-021 SERIES

SPECIFICATION

Sioux Chief 598-021 Series thermal expansion tank support kit shall be used where necessary to take the load and weight off pipes, fittings or connections to tube where thermal expansion tanks are installed in closets or near finished or unfinished walls. The expansion tank kit includes Sioux Chief's SaddleUp™ bracket with two #6 x 2" screws and stainless steel bands. Bands shall fit a range of thermal expansion tanks up to 5-gallons. Snap-lock bands shall be stainless steel and the SaddleUp™ bracket shall be galvanized. The mounting screws shall be zinc-plated for corrosion resistance.

INSTALLATION

Secure SaddleUp™ bracket with two #6 x 2" screws to wall making sure screws penetrate through a wood or metal stud. Thread end of band through bracket and around body the thermal expansion tank. Secure band tightly around tank. Either one or two brackets with bands can be installed. When installing one band, make sure band is centered on the tank. Band may be trimmed if desired.

MATERIALS

- SaddleUp™ Bracket:** 16 gauge galvanized steel
- Mounting Screws:** #6 x 2" Phillips, self-drilling, zinc plated
- Band:** Screw 5/16" hex head; 410 stainless
- Housing 201/301 stainless steel
- Band 1/2" width; 201/301 stainless steel

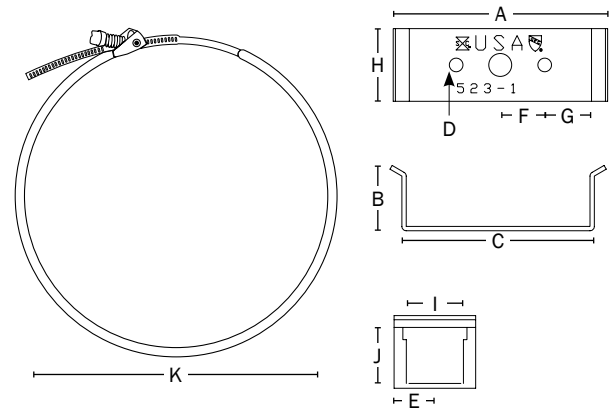

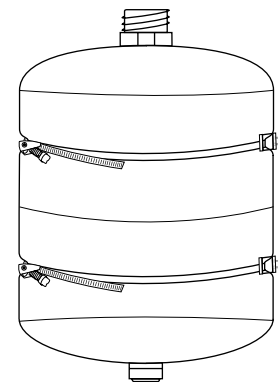

DIMENSIONS

- A: overall length 2.95" min.
- B: overall height 0.875"
- C: base length 2.625"
- D: mounting hole diameter 0.188"
- E: side to hole center 0.5"
- F: hole spacing 0.609" on center
- G: end to hole center 0.704"
- H: overall width 1"
- I: slot width 0.700"
- J: slot height 0.687"
- K: band 1/2" x .025"
(10" or 13" max. diameter)
